

SECTION 11

11.09 CONVERSION FROM A POTABLE TO A NONPOTABLE LINE:

All facilities converted from a potable water supply to a nonpotable water supply shall conform to the construction standards described herein. The facilities to be converted shall be investigated in detail including review of any record drawings, preparation of required reports, and determinations by Denver Water of measures necessary to bring the facilities into full compliance with these standard specifications. The applicant, owner or customer shall pay all costs associated with converting the system.
